ANGUS

Yearling Bull Sale

13th October 2026 at 2pm

**82 Clarence Valley Road,
Kaikoura, New Zealand, 7371**

BUYING ONLINE?

- This sale will be held as a HYBRID ON-FARM auction on bidr (bidr.co.nz).
- There will be online bidding and a livestream of the sale for bidders.
- All online purchasers must register with bidr through an account with a bidr partner agency before sale day.
- For help with signing up or registering, contact the bidr team on 0800 TO BIDR (0800 86 2437) or email enquiries@bidr.co.nz

Alternatively, contact your local bidr® representative:

Everyone in the industry knows that profitability within a cattle system can be improved by making educated predictions with factual data.

It's scientifically proven.

AngusPRO are a group of New Zealand Angus studs that encompasses about 40% of New Zealand's registered Angus cattle. These studs are part of the progressive governing body that is Angus Australia.

Angus Australia pride themselves on their quality of leadership in the delivery of innovative programs that will enhance and promote the value of Angus cattle and beef.

Conditions of Sale

ALL BULLS ARE TB & BRUCELLOSIS FREE

Inspection of sale cattle is invited prior to the sale by contacting the Auctioneers or the Vendors.

The sale Bulls will be penned in small paddocks from 12 noon on sale day.

INSURANCE

We recommend purchasers to insure their bulls on the day of the sale.

REBATE

All intending purchasers must register at the sales office prior to the sale.

PGW will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a PGW account who have introduced buyers to PGW before the sale and/or accompanied buyers to the sale.

The sale is conducted exclusive of G.S.T.

Although every care has been taken to ensure accuracy, no responsibility is accepted for any error that maybe included herein.

OSH

Every effort will be taken by the vendors, auctioneers, their staff and assistants, both on the day of the sale as well as on any other visits of inspection to ensure the safety of intending buyers and visitors. We wish however, to advise that while this sale is run under normal management conditions, certain dangers exist in relation to livestock and their environment. Visitors should take care to ensure their personal safety.

PLEASE BRING THIS CATALOGUE TO THE SALE

A black and white photograph of a man with short, curly hair, wearing a dark jacket over a collared shirt. He is smiling slightly and looking towards the camera. The background shows a rugged mountain range with some snow-capped peaks under a clear sky.

WELCOME

Welcome to the 17th Annual Woodbank Angus Yearling Bull Sale.

Firstly, we just want to thank you for your support at our winter sale back in June, we had a fantastic day and really appreciate your continued support!!

We're very pleased with this year's group of bulls we present to you. They have been selected for calving ease and suitability for heifer mating. The bulls selected are around breed average or below for birthweight and above breed average for calving ease. This group is very sound phenotypically, clean up front with good shoulders, reign of neck and supported with EBV data suitable for mating yearling heifers. We have selected this group of 40 from 195 yearling bulls.

We urge you to consider your own program carefully, the size of your heifers and your environmental circumstances when selecting your bulls. Structural assessment is very important as is the way your heifers are managed in the period before mating through to weaning that first calf.

EST. 1936

WOODBANK

ANGUS

All bulls catalogued have been blood test clear of BDV and vaccinated twice.

Stud Transfers - Any bull sold requiring a stud transfer for use in a registered herd will be at a minimum price of \$15,000 for a yearling bull. The purchaser or agent must state at the fall of the hammer and on the buyer instruction slip if a transfer is required.

Semen testing – All bulls presented for sale have passed a semen test completed by Xcell breeding Services.

We wish to thank all previous purchasers and supporters of our past sales and hope you'll join us again on October 13th for our 2026 sale.

Ben & Caroline

Understanding the TransTasman Angus Cattle Evaluation (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular

fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

Understanding Estimated Breeding Values (EBVS)

CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.
CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.
GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.
BW	kg	Genetic differences between animals in calf weight at birth.
200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.
400 Day	kg	Genetic differences between animals in live weight at 400 days of age.
600 Day	kg	Genetic differences between animals in live weight at 600 days of age.
MCH	cm	Genetic differences between animals in the height of mature females.
MBC	score	Genetic differences between animals in the body condition of mature females.
MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.
DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.
SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.
CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.
EMA	cm²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.
P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.
RBY	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.
IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.
NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.
Doc	%	Genetic differences between animals in temperament.
Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).
Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).
Leg Angle	score	Genetic differences in rear leg structure when viewed from the side (angle at front of the hock).
\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.
\$PRO	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd based in New Zealand that targets the production of grass finished steers for the AngusPure programme. Steers are assumed marketed at approximately 530 kg live weight (290 kg carcase weight with 10 mm P8 fat depth) at 20 months of age, with a significant premium for steers that exhibit superior marbling.

Higher EBVs indicate fewer calving difficulties in 2 year old heifers.	Calving Ease/Birth
Higher EBVs indicate fewer calving difficulties in 2 year old heifers.	
Lower EBVs indicate shorter gestation length.	
Lower EBVs indicate lighter birth weight.	
Higher EBVs indicate heavier live weight.	Growth
Higher EBVs indicate heavier live weight.	
Higher EBVs indicate heavier live weight.	
Higher EBVs indicate taller mature females.	Maternal
Higher EBVs indicate more body condition of mature females.	
Higher EBVs indicate heavier mature weight.	
Higher EBVs indicate heavier live weight.	
Lower EBVs indicate shorter time to calving.	
Higher EBVs indicate larger scrotal circumference.	Fertility
Higher EBVs indicate heavier carcase weight.	
Higher EBVs indicate larger eye muscle area.	Carcase
Higher EBVs indicate more fat.	
Higher EBVs indicate more fat.	
Higher EBVs indicate higher yield.	
Higher EBVs indicate more intramuscular fat.	
Lower EBVs indicate more feed efficiency.	
Higher EBVs indicate better temperament.	
Lower EBVs indicate less curl of the claw set.	
Lower EBVs indicate more heel depth.	Structure
Lower EBVs indicate a less angular leg angle.	
Higher selection indexes indicate greater profitability.	
Higher selection indexes indicate eater profitability.	Selection Index

XCELL
BREEDING SERVICES

SEMEN EVALUATION AND FERTILITY TESTING

Xcell Breeding Services semen evaluation and fertility testing is a practical method used worldwide to eliminate bulls with less than satisfactory breeding potential and is part of our procedure to demonstrate normal reproductive ability. Xcell Breeding Services uses this safe and reliable method to assist the breeder in their desire to produce quality animals.

The evaluation consists of:

- Palpation and examination of the testicles: the testis should be firm, equal in size with no palpable abnormality and have scrotal diameter in keeping with industry standards.
- The penis and sheath are examined for any apparent abnormality e.g. sores, lacerations, abscesses, hair rings, warts, cork screw, penile frenulum, scar tissue, signs of damage. During electro stimulation the penis must extend from the sheath, straight in the midline of the bull.
- Microscopic evaluation of a semen sample for Motility (% of live sperm within the sample) and Morphology (% of normal vs. abnormal sperm within the sample).

All the above information is considered and, where there is any departure from normal the bull is either failed outright or re-evaluated at a later date.

Each bull presented by **Ben and Caroline Murray** has undergone Xcell Breeding Services semen evaluation and fertility testing on **29/09/2026**

Greg McKay
General Manager

Disclaimer:

As the testing is often done some months prior to the bull being joined, it is important to appreciate that subsequent ill health or injury may render the animal either temporarily or permanently infertile.

It is important to observe young bulls working and it is good practice to back up mate with a proven sire after 2 cycles to cover the possibility of any possible subsequent temporary infertility.

NOTES

FMG
Advice & Insurance

BULL-PROOF

YOUR ASSETS AGAINST RURAL THEFT.

Theft and burglaries occur more often than you think, and the number of theft claims is increasing.

Every year FMG supports over 1,000 families impacted by theft and burglary. Alarming, 1 in 5 clients at rural addresses have been targeted more than once in the same year!

We think now's the time to put a lock on that trend. We have teamed up with NZ Police to create a Rural Crime Prevention Guide to help prevent theft and burglaries at your rural property – find out more at fmg.co.nz/rural-theft

We're here for the good of the country.

FMG Premier Bull Sale Insurance Form

What is FMG Premier Bull Insurance?

On receiving a completed FMG Premier Bull Sale Insurance form from an existing FMG client, FMG provides insurance cover for bulls including theft, death caused by certain accidents, injury, disease, illness or humane destruction and permanent infertility, provided the bull's purchase price does not exceed \$50,000 +GST. Please contact an FMG representative if you are not an FMG client, or you purchased a bull for over \$50,000+GST.

What is the length of cover?

Your specified bull(s) can be insured for up to 12 months on FMG Premier Bull Sale Insurance.

What are the benefits?

✓ <i>Infertility</i>	Cover if your specified bull has to be intentionally slaughtered due to permanent infertility caused by certain accidents, disease, or illness.
✓ <i>Theft or death</i>	Cover for your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
✓ <i>Vet costs</i>	Cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.
